Borrowing Money.

Borrowing money upon the installment plan is attended with the following advantages: The loan can be repaid in small monthly amounts which include the interest and part of the principal, so that by the expiration of the term it can be paid without any great inconvenience to the borrower. The rate of interest is generally lower. The expenses of obtaining the money are not so great as in ordinary loans, and if it is borrowed upon good paying property then it often happens that the rents will meet the monthly installments and in time pay off the debt.

For further and other particulars enquire of W. H. J. BROOKS, Agent for Savings and Loan Society, may 16-17. No. 12 Spring Street.

Los Angeles, May 8, 1875.

Los Angeles Herald

FRIDAY, JUNE 4, 1875.

THE HERALD has repeatedly urged the people of this valley, and especially those whose trees are yet young and unproductive, to engage in the cultivation of small fruit as a means of subsistence and source of revenue during the interim between the planting and bearing of their orange groves. Blackberries, raspberries and currants will bear the second year from the slips, and the third year will produce good crops. This class of fruit is always in demand and commands a fair price. To show what can be done in this line we instance the garden of Mr. WILLIAM FERRIS, of Florence.

We have before us twigs cut from the currant bushes of this garden, which are loaded with large ripe fruit of as fine a quality as can be grown anywhere. These bushes are but three years old, and though Mr. FERRIS estimates that owing to the dry winds which prevailed some weeks ago he has raised but half a crop, he will gather one ton of currants per acre. These sell readily at twenty cents per pound, which brings a return of \$400 per acre on what is termed but half a crop. It appears to us that this is making land pay very well in three years' time.

THE Los Nietos section is one which has heretofore been regarded as not adapted to the production of fruit. The surface is low and the soil rich and deep, and for corn-growing is equal to the Monte and superior to any portion of the State outside of Los Angeles valley. To this superior qualification we are now able to add another—that of fruit-growing. Yesterday Governor DOWNEY brought to the HERALD office an orange picked from a tree on the farm of Judge M. D. CRAWFORD, near Downey City, which will compare favorably with the best products of San Gabriel Mission. The orange is large, measuring one foot in circumference, and is as clear and bright as the foot-hill orange, and bears no sign of the scale bug or other orange-preying vermin. This is a fair sample of the fruit grown in the Nietos region wherever the trees have reached a bearing age, and we have no doubt that within a few years this part of the valley will produce a large amount of fruit equal in quality to that grown about this city. The tree from which the orange on our table was gathered is fourteen years old.

OUR old friend TIMOTHY GUY PHELPS recently made a speech in San Francisco, ostensibly to show the enormous increase from year to year in the cost of maintaining our State government, but in fact for the purpose of bringing forward the figures to prove BOOTH's Independent party administration to be the most expensive which has oppressed the people since the organization of the State. In marshaling his statistics he inadvertently, no doubt, paid a high and merited compliment to Gov. DOWNEY by proving that under his administration the expenses of the State Printer's department amounted to but \$31,199.96, since which time it has rapidly increased, until under the "reform" administration of BOOTH it reached in 1872 the startling sum of \$133,031.12. Thus it will be seen that in his attack on the Independents the roaring TIMOTHY GUY used an argument—figures won't lie—which proved that under a Democratic Governor the cost of maintaining the State government was many thousand dollars less than under Republican or BOOTH's "reform" rule. TIMOTHY, you have our thanks.

To the "Bulletin," Greeting.

A few days ago the San Francisco Bulletin contained editorials and communications advising the Independents of that city not to hold primaries, which bit of advice all regarded as a tacit admission of weakness on the part of the party in that city and an acknowledgement of a fear that should a weakness in numbers which would prove a strong temptation to the Republican leaders and the managers of corporations to go in and gobble the whole thing, as a Kansas turkey does the grasshoppers that invade his roost. It was a subject of comment among newspaper readers, and all agreed that the Bulletin's suggestions amounted to nothing more or less than an avowal of the utter hopelessness of the Independent cause in San Francisco. How strangely crooked is the career of a political journal, is manifested by the course of the Bulletin in more recent issues. Last Monday evening, under the head of "To the Interior, Greeting," it asserts that the Republican party has dwindled to a mere fragment of its former self, and that what remains is owned and controlled by corporations and political hacks; that the Democratic party is shaping its fight to suit the wishes of moneyed combinations, and that there is not a shadow of doubt but that the Independent party, which comprises all the honest men in the world, is largely in the majority in the city. On this assurance, so emphatically contradictory of its former admissions, the Bulletin sends greeting to the interior, and urges all to keep their eyes on San Francisco, the spot which it has purified and where all the honest men have congregated. Now, the truth is, that the Bulletin is only whistling to keep up its courage. It feels that it is approaching a graveyard—the one in which the Independent party is to be buried—and it is "scared."

Postage Outrage.

NEW YORK, June 2d.—F. A. Potts and Messrs. Groom, Bliss, Arthur and Clarke, the committee appointed by the Board of Trade to consider the question of the increased rates on newspapers and parcels, and the best means of securing the reduction of the same, met yesterday at No. 23 Park Row. At a previous meeting it was resolved to send out a circular stating the willingness of the committee to receive and consider all correspondence and suggestions relative to the matter. In reply to this circular several communications were received, among them one being from a prominent merchant, who said that the increased postage rates made \$6000 difference in his annual disbursements. The committee will hold several meetings during the next two weeks for the purpose of inquiring fully into the matter, and will then report to the Board.

Wool Market.

BOSTON, June 2d.—There is a fair demand for wool at steady prices. As the new clip is near at hand, manufacturers are buying cautiously only the kinds of wool really wanted, viz: combing and delaine fleeces. California wool has been arriving quite freely and is in demand, with sales at 22¢ to 23¢.

There is not a county in

the State in which the Independent party could, unaided, elect their ticket; and no one knows better than the Bulletin editor that at the next election San Francisco will give 5,000 to 7,000 Democratic majority. The arraignment by the Bulletin of the Democratic and Republican parties on charges of corruption and fraud sounds strangely like the cry of "stop thief" raised by the thief himself to throw his pursuers off the scent. But the dodge is too transparent to deceive any one. The people of this State gave the Independents a fair trial and that failure is only the more conspicuous and deplorable because so much was promised and expected, and so little received. The interior sends greeting to the Independent special-pleader—they will none of it.

The Wheeler Expedition.

There is a large amount of material for the WHEELER Expedition, consisting of guns, pistols, cartridges, saddles, etc., piled up in WELLS, FARGO & Co.'s express office in this city, and considerable curiosity is manifested as to the route and purpose of the expedition. So far as address is concerned, the material seems to have reached its destination, as it is all marked for Los Angeles, and the parties here who profess to know all about it are exceedingly reticent and decline to impart the information which all are desirous of obtaining. The following from the "Alta" is one version of the object of the expedition, though it may be far from the true one. It says: "The survey of the desert region of the Colorado river, under Lieutenant WHEELER, will begin at a bench mark at Los Angeles, and thence be carried forward under three parties, one going northward from San Bernardino on the crest of the Sierra Nevada, around the region of Death valley and Panamint mountains, and a third taking the Basin of the Colorado to the Needles to Diamond river on both sides of the valley." There are, however, other opinions as to the duty which Lieut. WHEELER is sent out to perform; one of which is that a railroad survey is the real object sought to be attained, and that certain parties have used their influence with the Government to obtain information at the public expense which they did not care to purchase out of their private means. We await further developments.

The Ohio Republicans.

COLUMBUS, Ohio, June 2d.—At the Republican State Convention to-day the following ticket was nominated: Governor, R. B. Hayes; Lieutenant-Governor, T. L. Young; Supreme Judges, G. W. Mellvaine and James Williams; Attorney-General, John Little; Treasurer, Jno. Minor. The following platform was adopted: "That the States are one as a nation; that all citizens are equal under the law, and entitled to the fullest protection; such a policy of the finances should be pursued as would, without a shock to business, ultimately equalize the purchasing capacity of coin and paper money; in favor of a tariff for revenue with protection to American industry; liberality and generosity should prevail in the adjustment of pay and boundaries; the public domain should be scrupulously reserved for actual settlers; the observance of Washington's example of retiring at the close of a second Presidential term will be, in the future as in the past, regarded as a fundamental rule in the unwritten laws of the Republic. The distinguished success of Grant's administration, which, to the fame of a patriot and a soldier, has added that of a capable and judicious statesman, entitles him to the gratitude of his countrymen."

The Border Troubles.

BROWNVILLE, June 2d.—Mexican cavalry have been stationed at various points between Camargo and Matamoros. General Cortina has had a difficulty with Señor Trevino, living near Reynosa. Trevino was informed of the theft of some cattle. He found the thieves and recognized them as servants of Cortina, and riding up to the party informed them that they must go with him before the Alcalde. They fired on Trevino and killed him, killing one man and wounding another. He then made a prisoner of the head man of one of Cortina's ranches. Cortina, with 135 men, went to the Alcalde and demanded the prisoner's release. Trevino refused, whereupon Cortina hanged the Alcalde and afterwards shot Señor Trevino. Yesterday Cortina received an order to report to the City of Mexico for duty. He declined to obey the order, stating that his resignation had been forwarded to the proper authorities. Captain McNally's company is stationed at Edinburg. The captain has information of the crossing of three droves of stolen cattle within the last week. Some depredations are reported along the route from Ringgold to Fort Brown.

Arizona Items.

[Yuma Citizen, 29th.] The Colorado river has been rising slowly all the week and is now four or five feet higher than at any time this Spring.

Mr. A. Hawkins left here on the 20th inst. with wagons, carrying the Merino sheep and Berkshire pigs and leading the Durham bull belonging to Gov. Safford and Mark Maloney, which stock we described in a recent issue. We hope they will get safely through, for they are very valuable animals, and in a short time will make a great improvement in the stock of Arizona.

W. L. Hopkins, Esq., one of the most energetic, enterprising and successful business men in the State, arrived in town a few days since and is taking a little rest. Mr. Hopkins gives his mines his personal attention, and very seldom gets away. We are glad to know that this ore, which is very abundant, grows richer in value as he descends in his deep shafts.

As Rafael Barrette was working in a shaft in the Wm. Penn mine, Castle Dome District, on the night of the 18th inst., a lump of metal weighing 20 pounds, fell a distance of 35 feet, striking him square on the head. The blow broke his skull into many pieces, wounding the man badly, but did not fracture the skull. He is now doing well, and being one of Sonora's finest men, will be able in a few days to stand a few more of the same sort. Arrived yesterday from Tucson, the following fleet of prairie schooners: Trains of James Quinn and George Fields, with bullion and wheat; for Wm. B. Hooper & Co., and train of Lazarus, John Hovey, wagon master, with barley for J. Samter, and hides, pelts and furs for San Francisco.

In the leading Eastern markets for breadstuffs during the past week the bears have held control and prices been depressed. This has been accomplished easily by two means—the tightness of the money market and the great grain regions of the valley of the Mississippi and Missouri would not be injured by grasshoppers. Of course, so long as the depression in finances exists there will be a natural tendency to low prices in the grain market, but it is now ascertained beyond a doubt that the grasshopper plague of the Northwestern States is more disastrous than the Western States. Western Kansas and Iowa are rendered desolate by the plague and Kansas and Nebraska have experienced almost as severe a visitation. The wheat and corn crop from these productive regions must necessarily be quite short, so that the bears cannot long hold their grip on the Eastern grain market.

Advices from Europe indicate a light crop and there has been quite an increase in exportations from New York owing to this fact and the low prices ruling. In Austria and Hungary much of the wheat had to be plowed up. In Baden it was hoped the last rain would benefit the wheat, but the report says farmers plowing their fields over, owing to the hopeless outlook. The heavy snow in Russia melted slowly, and farmers had no chance to commence work early. Summer rye, wheat, barley and oats have suffered badly.

The following reports will show the condition of crops in California:

BUTTE COUNTY.—The late rains have proved of incalculable benefit to the farmer, as it will assist him to sow his grain in time. There is every promise now of a good harvest.

COLUSA.—The headers have been busy for two weeks, and fields are turning out much better than was expected. The harvest is the earliest ever seen in that valley. On Thomas Creek from Tehama grain never looked better.

CONTRA COSTA.—All the well cultivated fields are exceeding the farmers' expectations, but late sowed or poorly cultivated grain will yield a very small crop. The central and western districts will turn out an average yield. The farmers are cutting the barley and wheat will be ready for reaping before the early harvest.

KERN.—The harvest is most promising, the grain ripening well without irrigation. Well cultivated crops are turning out a usual yield. The late sown grain will give an average crop, owing to the late rains. A fair crop is expected from the early sown crops.

MERCED.—Large quantities of hay have been cut in volunteer fields and winter-sown Summer-fallowed fields will yield fair crops of wheat and barley. The prospect for a fair yield is good, though the average will be below last year.

MONTESERV.—On the uplands from Castroville to the Mono River the prospect is good for an average crop, and it is now estimated that the crop will fall but little below last year's. There were 44,000 tons of grain shipped from this valley, and the grain for shipment this year is not much less.
